

- Robust stainless steel construction.
- Can be used for both wet and dry applications.
- Can be flange pipe mounted as well as open in channels or chutes.
- Can be combined with compactors and screens to increase each machine's efficiency.
- High material capacity.
- Easy changeable drive unit, shaft extension, submersible motor, hydraulic motor.

Grinder RK shreds & grinds solids in water, sludge & waste.

Grinder RK combines the advantages from comminutors and Industrial waste shredders. Treating both wet and dry materials in closed pipe applications as well as open channels. Counter rotating blades ensure that all passing material is grinded.

Twin shafted wet waste grinders have been well proven in over 40 years with tens of thousands of references.

The concept is a evolution from comminutors and dry waste shredders adapted for the demands of today.

Height 300-1500mm  
Width 300-600mm  
Flow capacity 30-300l/s

MN has hundreds of international references and has worked with machinery within water treatment for 30 years. We offer the most innovative solutions and the most extensive knowledge on screening equipment. We make all our products ourselves acc to ISO & CE standards, We only use certified materials and welders.
