Multi Rake MR

Multi Rake MR is a modern mechanically raked coarse bar screen that separates debris and rubbish from influent. Typical installations in pump stations, water intakes, and wastewater treatment plants. Conveyor chain drive with multiple rakes allows for fast cleaning cycles yielding high flow and conveying capacities.

Discharge height 1-50m
Width 500-4000mm
Bar spacing 6-50mm
Capacity 10-100000/s

MN has hundreds of international references and has worked with machinery within water treatment for 30 years. We offer the most innovative solutions and the most extensive knowledge on screening equipment. We make all our products ourselves acc to ISO & CE standards. We only use certified materials and welders.
