

Ram Press RP

- Robust quality stainless construction enables high compaction forces and good dewatering.
- Modern design on well proven concept capable of conveying distances greater than 10m.
- Stainless steel hydraulic power unit.
- Selectable perforation type for high dewatering and efficient drainage.
- Enclosed, safe & hygienic.

Ram Press RP

Ram Press RP is a hydraulic conveyor press that compacts, dewateres, and conveys screenings and wet waste. It consists of a pipe with a hydraulic ram that forces the material into a pipe system, creating backpressure for compaction and dewatering.

Height 300-700mm
 Diameter 150-400mm
 Inlet length 500-2000mm
 Dryness 20-30%
 Capacity 0.5-4m³/h

MN has hundreds of international references and has worked with machinery within water treatment for 30 years. We offer the most innovative solutions and the most extensive knowledge on screening equipment. We make all our products ourselves acc to ISO & CE standards. We only use certified materials and welders.
